Full Stack Engineer

www.linkedin.com/in/cetin
<http://ahmet.cetin.info>

Technical Skills:

Strong: Javascript, Nodejs, Express, HapiJS, AngularJS, React, BackboneJS, jQuery, Chrome Extensions, HTML

Experienced: VB.NET, C#, D3, MySQL, MSSQL, MongoDB, Sequelize, memcached, AJAX, CSS

Projects:

ContractFix (<https://contract-fix.herokuapp.com/>), the easiest way to finalize contracts - Full-Stack Engineer
Application where users can create contracts from templates or from scratch. Contract draft can be changed with track changes; shared with other users and signed using digital signature.

- Architected the full stack and implemented the backend RESTful server using NodeJS, HapiJS, MongoDB.
- Utilized JWT token-based authentication.
- Engineered the digital signature using OpenPGP.js, signing user interface using AngularJS and jSignature.

Cliqmark, Online Bookmark Manager - Full-Stack Engineer

A Chrome extension that generates visually recognizable bookmarks within a dashboard to manage bookmarks in browser with searchable functionality

- Architected the full stack and coded back-end using Node.js, Express, Sequelize, MySQL database.
- Utilized JWT token-based authentication.
- Developed the Chrome extension to create the bookmarks with AJAX call to server.
- Supervised the AngularJS client development for server calls, application logic and authentication.

Dvelop.io (<https://shining-torch-3159.firebaseio.com/>), Developers' LinkedIn - Full-Stack Engineer

Platform for developers to find other developers sharing the same interests, utilizing chatrooms (similar to Slack).

- Designed the data structures, used Firebase on backend as project requirement.
 - Integrated Firebase's authentication API with GitHub's OAuth in AngularJS app.
 - Designed and developed the Slack-like chatrooms, direct messaging.
-

Professional Experience:

Echo Investment SA, Project Manager

2008 - 2015

- Led team to redesign company structure from being solely process oriented to a project driven structure.
- Spearheaded the development of two shopping mall projects, from conceptual design, including marketing, and leasing until point of construction.
- Supervised the website development for the commercial projects (www.mundocenter.hu, www.korona-brasov.ro).

DAT Computer Concepts, CTO, Partner

2001 - 2007

- Led the team for implementing Oracle Primavera project management software for medium-to-large sized companies including Siemens, Sygnity, and Echo Investment, including integration of the software with clients' existing systems and proprietary software.
- Supported the sales team.
- Trained 100+ professionals on project management and planning (Oracle Primavera and Microsoft Project).

GAMA Industrial Plants, Inc, Technical Office Manager

1998-2001

- Designed and developed desktop software for managing workflow of hardcopy documents using Visual Basic on the client software and MS SQL Database as backend using stored procedures.
- Optimized the data collection on site; analyzed progress and man-hour data on the construction site

Prota Software, Software Consultant

1996-1997

- Assessed the requirements of different clients and communicated with development team; led the customer support of the [Probina-Orion](#) structural design software
-

Education:

Hackreactor, Advanced Software Engineering Immersive Program

2015

Middle East Technical University, Civil Engineering, BSc.

1989-1996
